Looking Forward into the coming year - -

MERCHANDIZERS are generally planning for a buyers' market in 1947. Quality and service will again be words with meaning for the selective buyer.

Flowers speak a universal language and demand has been constant even though prices will fluctuate. Supplies of seeds and other items, are adequate, with a few exceptions; however, transportation shortages and delays may cause temporary difficulties.

We, at Somerset, have endeavored, in presenting this catalog, to offer you the best in seeds, plants, and the newest as well as the old, tried pest controls.

Your co-operation of the past years is appreciated and we hope that we may continue to serve you.

AUGUST W. BOSENBERG,
LOUIS C. SCHUBERT.

SNAPS

FOR GREENHOUSE FORCING

The best possible strain you can get, is the first step toward a profitable crop. The originator has a self-interest in keeping his introduction up to the highest possible standard, therefore because of this, we handle originator's greenhouse grown strains almost exclusively.

WHITE ➡ Tr. Pkt.
Bezdek's White Wonder Improved. Excellent early white \$1.50
Earlier Westover White. A great improvement in earliness, color, purity and uniformity 1.50
Junglewood White. (Silver Medal N.Y.F.C.) Very long spikes of dazzling white. May be flowered in November, but best for January and February 2.00
Koesters White. An excellent white and one of the best 1.50
Lucky Strike Imp. Really a new variety, early, free flowering. A profitable sort. . . 1.50
Margaret. Ivory white similar in growth to Mary Ellen and recommended as a fine winter flowering sort 2.00
Paper White. An improvement on Schlegels Early White 2.00
Snow White. Without question the best late white 1.50
Westover White. Rather late but a profitable sort when well grown 1.00
White Peggy Schumann (new). A fine white with all of Peggy's good points except it is somewhat earlier 2.00
White Prosperity. A popular, profitable all season sort 1.50

PINK

Better Times. A hybrid with the color of the Better Times Rose and the habit of Christmas Cheer 2.00
Cheviot Maid Supreme. The old favorite rose pink 1.00
Christmas Cheer. Hand pollinated hybrid and the most popular rose pink 3.00
Daybreak. Clear bright pink 1.00
Dorcas Jane. A fine soft pink, first generation hybrid by Yoder Bros., that impressed us very favorably. Early, free flowering, we can recommend it. 1/2 Pkt. 1000 seeds \$1.50 . . . 2.50
Gilberts Pink Supreme. Deep rose, preferred by many over Rose Queen 1.50
Light Pink Peggy Schumann (new). Similar in all but color to the popular Peggy. . . . 2.00
Maiden's Blush. Appleblossom pink 1.00
Marie Louise. Light shell pink, good for spring bloom 2.00
Mary Ellen. Very popular silvery pink hybrid 2.00

ASTERS

(12000 seeds per oz.)

Wilt is a soil borne disease and can only be entirely prevented by soil sterilization. This is comparatively easy and inexpensive. Where steam is not available, formaldehyde gives good results. We will be glad to furnish instructions on the use of this material. Where the soil is reasonably clean of wilt, good results may be had with wilt resistant strains such as we offer. Yellows is carried mainly by leaf hoppers and, to prevent infection, cloth or greenhouse protection is necessary. The longer stems and larger flowers usually pay for this extra care.

AMERICAN BEAUTY (Wilt Resistant)

Valuable for their very late bloom, bearing large compact flowers on long stems.

Petunia Giant Double
Ruffled and Fringed

Petunia Dwarf Cali-
fornia Giants

PETUNIA

ALL DOUBLE DWARF FRINGED GLORIOUS MIXTURE.

This fine strain of All Double Petunia is the result of the work of a rising young American Hybridizer, Mr. Charles Weddle. Remarkable for the large size of the flowers and the fine growth habits. It includes:

Dwarf Fringed Glistening White, occasionally tinged with pink at the center. Very large flowers and excellent habit for a pot plant. Dwarf Fringed Salmon Pink. An entirely new color in Petunias. Flowers up to 4 inches on compact plants. A really outstanding item. Dwarf Rose Pink. Flowers of medium size on a dwarf plant suitable for pots. Dwarf Fringed Deep Rose Pink. Very large flowers on dwarf compact plants. Dwarf Fringed Deep Purple. Dwarf and compact and excellent for pots. Fringed Lavender. Sometimes touched with white, the flowers are large. The growth is somewhat tall for pots, however, by pinching, they may be used for this purpose. Seed supplies are not sufficient to meet the demand for straight colors so they have been blended into a mixture that is truly glorious.

Mixed Packets approximately 1000 seeds **\$4.00**
1/2 packets **\$2.50**

White. A limited amount of pure white is also available. 1/2 packets **\$2.50**

ALL DOUBLE COLOSSAL SHADES OF ROSE. A.A.S.

Extremely large all double blooms up to 5 inches across in rich rose shades on vigorous compact plants, excellent for pots or bedding 500 seeds **\$3.00**; Pkt. 100 seeds **.85**

ALL DOUBLE AMERICA (SILVER MEDAL A.A.S.—1943)

A 100% American introduction producing medium size carnation flowered blooms in a bright shade of pink. More satisfactory for outside bedding than the Victorious Strain. It produces its flowers very freely all summer on compact plants.

1/64 oz. **\$7.50**; 1/32 oz. **\$13.75**; 1/2 Tr. Pkt. **\$1.25**; Pkt. **\$2.00**
(approx. 1000 seeds per pkt.)

GIANT DOUBLE RUFFLED AND FRINGED

Originally developed from the famous Shepherd Strain. Noted for its fine color range, this has been refined to where it is more compact and produces 65% true double fringed flowers of immense size. The balance are semi-doubles and singles which because of their gigantic size and color will sell readily.

This strain is superior to the All Doubles for bedding and box work and makes an excellent pot plant when well grown. Because of their vigor they must be grown close to the glass with plenty of ventilation. **Formula Mixture.**

1/64 oz. **\$6.00**; 1/32 oz. **\$11.00**; Pkt. **\$2.00**

With labor such a factor, this important cut flower assumes even greater importance. Sowing directly in the bench makes for stronger, more vigorous plants. Careful thinning, selecting the strongest notched leaved seedlings to remain and proper feeding (1 lb. Ammonium sulphate to the 100 sq. ft. every two weeks until buds form) will assure a high percentage of doubles.

Debonair

DEBONAIR (Yoder Bros.)

A rich crimson red decorative pompon that blooms normally December 5. The beauty and symmetry of its form combined with the velvety gloss of its rich and intense color has never failed to create enthusiastic comment. Debonair can be lighted for the Christmas season. The growth is vigorous and healthy, and because of the strong consumer demand for this color, it commands premium prices.

Price \$90.00 per 1000

 CUT FLOWER CHRYSANTHEMUMS AND CARNATIONS.

Sunkist

SUNKIST (Yoder Bros.)

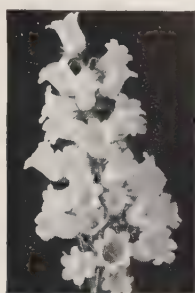

An intense golden yellow single that flowers normally with Vibrant December 20, for the Christmas season.

The variety lends itself to wide variations in culture and dependably produces a profitable crop. Like Vibrant, Yukon and Rosalind, it is well suited to late planting and ground bed culture. In preliminary trials it has responded very satisfactorily when lighted for delayed flowering. Easily grown and readily sold, Sunkist fills a real demand for Golden Christmas Daisies.

GOOD FOR COMMERCIAL CUT FLOWERS — GIVE GOOD RESULTS OUTDOORS OR UNDER GLASS

Large flowers of greenhouse quality can be grown outdoors. A splendid item for resale at retail and unexcelled for growing commercially outdoors either open or under cloth. Fine for the greenhouse where they can be grown as sprays or disbudded. Under glass they flower from middle to end of October, outdoors they bloom earlier as noted.

ALABASTER. A very early white of large size and good substance. Slightly incurved and will grow five inches across if disbudded. Every mum collection should have this one. September-October.

ALWIN. Beautiful salmon pink. A very unusual shade. Grows on nice stiff upright stems. Nice grown in sprays and should also be very nice disbudded. Early October.

ANTELOPE. Salmon-amber with distinct glow of orange on inside of petals; an extremely large incurved exhibition flower, easy grower, long stems, 4 ft. Late September.

BALCOMBE GOLD. A bright old gold. Not a yellow; more of a bronzy orange. A color hard to describe. Flowers incurved and really large if disbudded. October.

COPPELIA. This is quite a new shade, a bright Indian red —very startling and does not fade with age. Fine strong stiff stems that grow lovely in sprays. One of the best sellers in both plants and cut flowers. September-October.

CORAL QUEEN. A very lovely large salmon coral. A beauty. Good in sprays, also disbudded. Early October.

DOVEDALE. A fine white but must be disbudded to be at its best. Early October.

FREDA. A beautiful bright silvery mauve-pink, very lovely for cutting. May be disbudded but equally good grown in sprays. Makes a great wealth of flowers and very resistant to frosts. One of the loveliest varieties that we have ever grown. Everybody should have Freda, Salmon Freda and Bronze Freda. September-October.

FORWARD. This is another step forward, especially for exhibition; may also be used for market; blooms 6 inches across with stiff petals incurving at the tips; color, silvery-peach-pink; a real beauty. 2½ to 3 ft. Early October.

GOLD STANDARD. This is a true early disbudding variety. The color is as deep as it is possible to get in yellow, with broad florets. Does not fade in sun or rain. May be grown up to 7 inches across. Recommended to early exhibitors. September-October.

JEAN HARLOW. A bright golden yellow with semi-incurved form. September. Best grown in sprays as a commercial.

LEDA. A large heliotrope pink; flowers 6 inches across when disbudded. Also good grown in sprays. Beautiful rolled petals. Stems are extra strong. October.

MRS. T. RILEY. A very fine white. Large reflexing blooms made up of very broad petals. Very free and erect. You should have this one. October.

NITA. Primrose yellow. Large well formed blooms on tall stiff stems. Best disbudded. September.

ROSE PRIMROSE. An excellent variety, one of the best in recent years. Fine variety either disbudded or in sprays. Nice long stiff stems. Salmon rose with a basal blush of gold. Not as early as some of the others, thereby lengthening the blooming season. Oct.

REVELLER. Bright chestnut red semi-double of good substance; real commercial market type on long stems. Good clean grower and easily disbudded. Stands the sun well. September-October.

SYBIL. Large lavender pink. Stiff stems. Good disbudded or grown in sprays. A real acquisition. Also an early bloomer. September.

HOW TO USE SODIUM SELENATE

The use of Sodium Selenate on greenhouse cut flower crops has proved so successful in controlling aphids, red spider and other mites, foliar nematode and Chrysanthemum midge that its use will no doubt greatly increase.

A deadly poison, Selenium is toxic to all forms of animal life and most plants although plants may absorb limited amounts without injury. Ageratums, Chrysanthemums, Carnations, Cyclamen, Snapdragons, Geraniums, Hydrangeas have all been successfully treated with Sodium Selenate. Roses and other woody plants do not lend themselves to treatment.

Sodium Selenate is available in a powder that may be mixed with water and in a dry form called P-40 which is a mixture of superphosphate and 2% Sodium Selenate.

On bench crops use one ounce of Sodium Selenate per 100 to 110 square feet. This amount should be dissolved in 25 gallons of water and applied at the rate of one quart per square foot. This material may also be applied with the Hozon Proportioner, a siphon attachment for a watering hose. For this method, one ounce of Sodium Selenate is

dissolved in six quarts of water for dilution to approximately 25 gallons through the siphon and hose as it is applied to 100 square foot of bench. Keep solution from foliage and stems, or syringe off immediately after applying. This is the most economical method.

The P-40 or dry form, which is the most popular, should be applied when the foliage is dry at the rate of 3 pounds per 100 square foot of bench space.

For Pot Plants the best method is to dissolve one ounce of Sodium Selenate in 30 gallons of water and give a moderate watering approximately 1/2 glass to a 5 inch pot.

Freshly planted stock should not be treated until 2 or 3 weeks after planting. Do not apply a second treatment in less than 3 or 4 months. Under certain conditions and with some plants it is advisable to cut the strength of the treatment in half and give two treatments two weeks apart.

Tests indicate that soils treated with Sodium Selenate under normal conditions of watering and leaching are safe for vegetables for human consumption after four to six months.

Insecticides and Fungicides
